

Yolanda Pastor

Candidata a l'Alcaldia d'Oliva

PROJECTE OLIVA

I am **Yolanda Pastor**, candidate for Mayor of Oliva with **Projecte Oliva** (PRO Oliva) and in this program you will find the main action points of our manifesto aimed at improving our town.

Projecte Oliva is an independant local party with 8 years of experience in managing our town. In the 2011-2015 elections we won two council seats, in the 2015-2019 elections we won four. Throughout these past years our vocation has been providing a service to you in making our town a better place to live. Projecte Oliva has driven important improvements in Oliva in the areas of education, sports, tourism and public participation.

Effort, consistency, work ethic and humanity are what you'll find within our team. Our political platform does not respond to orders from a higher level which makes an ideal platform for us to be accessible to local people looking for a polite, direct and warm service from their representatives.

In this leaflet you will find our proposals for the distinct areas of action that, with your help we will achieve. All of our proposals have been inspired by reform, are environmentally friendly and include a youthful point of view, as we feel that the younger generation are our future.

The 20 proposals and 20 projects are at your disposal on our website www.projecteoliva.es. Our offices are situated on Calle San Carlos, 8 where you are welcome to come and comment or give us your opinion on our proposals.

With the maximum responsibility we ask you to accompany us and show us your support with your vote as you know what Oliva needs and that we are capable of achieving it.

Let's make it possible!

FeS-HO POSSIBLE!

20 PROPOSALS to make Oliva a better place to live

- 1. URBAN PLANNING:** We need an updated urban plan for the town supporting all the principal access points and that will reflect future growth (new PGOU). The actual plan was drawn up in 1982 and represents a town that no longer exists. We will also create an Accessibility and mobility plan based on the use of bicycles (PMUS). To find the optimal solution for all residents of carrer Comte d'Oliva, carrer Niño and Natzaré
- 2. CONNECTIONS:** Connect Oliva with Piles along the coast, and with the new PGOU, chart out future connections with Oliva Nova and access for the town to the beach.
- 3. AGRICULTURE:** Create a local office of agriculture for our farmers to have access to information and a direct contact with their councillor for agriculture. Provide a sanitary water supply for the Poligono El Brosquil. Provide a calendar with agricultural formation courses and informative meetings.
- 4. MUNICIPAL VIGILANCE:** Continue the installation of cameras and CCTV to prevent further thefts in the country side and to heighten security.
- 5. BUSINESS:** To make Oliva an attractive option for the Business person we need to provide the necessary infrastructures. It's important that we open an entrepreneurial office to support and streamline the process for new businesses and facilitate the day to day function of pre-existing business.
- 6. INDUSTRIAL ESTATES:** improve the access to the poligono Jovades with a deceleration lane. To achieve a southern access point as entrance and exit for transit pertaining to produce generated by our Industrial estates. HGV parking at the Poligono El Brosquil.
- 7. COMMERCE:** Create an APP and platform on the web for local commerce where the local Business person can advertise their Business on-line. To work in collaboration with ACCO.
- 8. MODERNISING public administration:** We will adapt local administration and bring it into the digital era. An electronic administration is more accessible to the public, more efficient and flexible.

FeS-HO POSSIBLE!

- 9. SPORTS:** We consider that a larger Sports centre would be economically difficult to sustain. For this reason we feel that it would be more realistic to partially cover the outdoor courts and pitches and offer adequate maintenance to all sports installations and services. Provide sports areas in certain districts. Enhance the ALEEO, clubs and municipal schools sports.
- 10. CULTURE:** The reformation of the Olimpia theatre is essential. To finish the Works remaining at the centre Olivense is also inevitable.
- 11. FESTIVALS:** Our local festivals are our heritage, for this reason we will facilitate the administration process where at current our associations are immersed in bureaucracy every time they have a public display. Provide support for all festive entities within the town.
- 12. WORKS AND SERVICES.** Renovation of the mobile municipal brigade and create a digital system for the administration of incidents. Provide constant maintenance to children's parks and reform and revitalize pavements. Draw up an integral plan to renovate all public walkways.
- 13. HUMAN RESOURCES:** Modify the relation of work places (RLT), optimise existing resources and reinforce key departments to enable a more functioning Town hall.
- 14. SECURITY:** Oliva is a secure town, however, we need to apply a better urban discipline, control the sale of illegal goods and implant more police presence in certain districts. Finish the local police station.
- 15. OLDER GENERATION:** Provide a day social centre for dependants and continue with all the activities we have provided this last term.
- 16. SOCIAL WELL BEING AND WOMEN:** Place in motion the prevention of violence and equality of opportunities in all municipal areas through social awareness and articulated through politics for mainstream gender equality. Demand the construction of a new medical centre San Francesc.
- 17. EDUCATION:** Create an integral plan against school absenteeism with the collaboration of different professionals specialising in these cases. Continue with the execution of the reformation of schools with the grants achieved.
- 18. ENVIROMENT:** Our governing actions are always inspired with a regard for reducing environmental impact.

- 19. TOURISM:** Create a CDT (centre of local touristic development). Provide a plan of all scenic walkways and correctly signpost. Value natural areas such as la Font Salada, la Marjal and the Santa Anna castle. Establish agreements to increase the advertising of our touristic products, offers and the promotion of our image to increase our chance to compete. Offer the possibility to increase touristic accommodation with a new PGOU. Develop a complete program of activities from April to September to reactivate the maritime centre.
- 20. BEACHES:** The access to the beaches will be our first point of action. We will create parking areas for the 6 beaches; provide adequate access with recycling bins, benches and shaded areas. Increase the total amount of installations and services until all areas have complete lifeguard coverage.

20 PROJECTS

1. Paving of the Paseo Joan Miro and bring to term the prolongation of the Paseo Joan Fuster and the remodelling of the l'Estacion park (taxi rank)
2. Finish construction of the Local Polica station.

18. Execute a pilot Project for natural beaches and compatibility of uses.
19. Install pic-nic areas alongside all natural and touristic zones.
20. Provide a Police station at the Beach for the summer season.

FeS-HO POSSIBLE!

- **Continue to demand and reclaim that the superior authorities provide Oliva with all necessary infrastructures: south access, exempt from tolls on the AP7 and a train line.**

We will continue to work, as we have up until now, in constant contact with our neighbourhood associations, school councils, agricultural societies, Sports entities, culture, tourism, Semana santa bands, Falles, Moros y Cristianos In a way that public participation is positive for all involved, we will be consistent in the continuing maintenance of municipal installations and above all we will be open and accessible to all citizens. Yolanda Pastors team are humane and prepared to listen, manage and solve problems. We are convinced that in politics it is essential to be in direct and constant contact with the public.

Lets make it possible!

Res-NO POSSIBLE!
